G. Bernard Shaw On Anglo-American Relations

Famous Writer Discusses Attitude of Great Britain Toward United States with His Customary Frankness and Brilliancy

"By George Bernard Shaw"

Recent photographs have shown that George Bernard Shaw is somewhat shorter and thinner than he was a few years ago. This is probably due to American influences, for the line of the New York Times, as he himself states, is a health motive force. The Times is the national newspaper of Great Britain, and it is set up for the promotion of public health. Shaw is a leading advocate of this policy, and he has been a constant contributor to the Times, both as a writer and as a reader. He is a man of great energy and determination, and he is always ready to take a stand on any question that he considers important.

One of the questions that he considers important is the question of Anglo-American relations. He has written several articles on this subject, and he has expressed his views on the matter in a series of lectures that he has given in the United States. These lectures have been published in book form, and they have been widely read. Shaw is a man of great courage and determination, and he is always ready to speak out on any question that he considers important.

Recently, he has expressed his views on the current controversy between the United States and Germany. He has been a strong advocate of the United States, and he has written several articles on this subject. He has been a constant contributor to the Times, both as a writer and as a reader. He is a man of great energy and determination, and he is always ready to take a stand on any question that he considers important.
will be wildly unlike what our fire-eaters expect. I prophesy that the scientific pro-German will yet shake hands with the scientific jingo power balancer on a basis of smashing the Hohenzollern Holy Roman ambition by an allied victory, and then roping Germany into a combination which will include the whole of Western Protestant civilization, uncomplicated by the heterogeneous impermanence of the present Eurasian Alliance. France would not stand aloof even if she could afford to; for France is republican and Voltairean; and the deism of Voltaire and Rousseau, once absurdly called atheism, has practically become the faith of all the Free Churches of England and America that are still intellectually fermenting; though they have not yet noticed it, being largely ignorant of what Voltaire and Rousseau really preached. And how old-fashioned do those names now seem in the days of Bergson! It will indeed be a struggle between France and North America for the honor of being the Mecca of republicanism.

If this is not our aim, then will some one kindly tell me what is our aim, and why the United States is helping us so powerfully to achieve it?
